SWISS TECHNOLOGY

I Sky

During your cable car journey, which lasts approximately 10 minutes, you will enjoy breathtaking views stretching from Alanya in the east to Finike in the west of Antalya. This unique experience is accompanied by endemic vegetation consisting of pine, cedar, and juniper trees within the boundaries of the national park, as well as mountain goats and birds of prey. As you approach the home of Zeus, you will be greeted by rugged mountain steppes, followed by a stunning view at the summit of Mount Tahtali.
