

At this hotel, where you can enjoy quality time with your family and create beautiful memories, we prioritize environmental protection while serving you. Our sole aim is to protect the environment, respect other living creatures as much as ourselves, and defend their right to life. We have adopted an environmental policy that adheres to current laws and practices, and most importantly, with the support of our guests.

The points mentioned below will be constantly updated according to today's requirements and needs in order to fully adhere to the principles of environmental sustainability and to minimize environmental impacts, but will never deviate from the target.

- * By keeping the factors that may cause environmental pollution under control,
We will minimize pollution and damage.
- * Focusing on continuous improvement in energy efficiency, we aim to reduce the energy used in our hotel.
and we are committed to using renewable energy sources.
- * We try to use water, energy and all natural resources economically. We
We share it with our employees, guests and suppliers.
- * We measure our performance in environmental management, monitor this data with targets and
we try to improve our performance.
- * We aim to educate our employees about the environment and increase their awareness.
- * We aim to minimize waste production and encourage recycling. Our waste management processes
reviews, develops strategies to reduce waste and prevent waste from harming nature
We take precautions for.
- * We adopt water conservation policies to protect water resources. We optimize water use,
We prevent leaks and implement water-saving technologies.
- * To increase environmental awareness by offering environmentally friendly options to our guests and employees.
We aim to: Prefer environmentally friendly products from our suppliers and support sustainability.
We encourage applications.
- * Our commitment to protecting the natural areas around our hotel and supporting sustainable tourism
We use natural resources sustainably without harming local ecosystems.
- * We educate and raise awareness of our employees on environmental issues. We encourage their participation and
We work together to achieve goals and promote aculture of environmental sustainability in our hotel.

One of the most important steps in sustainability is ensuring energy efficiency. Energy use should be measured first, problems identified, and potential savings identified. Low-consumption equipment and systems should be preferred. Long-term improvements should be achieved through automation management and monitoring of resources. Energy savings should be continuously analyzed through maintenance, monitoring, and surveillance.

To protect our world from potential dangers, we use our energy efficiently and set goals to reduce our energy consumption.

At Amiral Palace Hotel, we are aware of the negative consequences of depleting energy resources, global warming, and the environmental damage caused by fossil fuels. We have chosen renewable energy sources and strive to reduce our carbon footprint.

Amiral Palace Hotel, Environmental Elements Planned to be Realized within the Scope of Sustainability:

- * To benefit more from solar energy, what can be done on solar energy?
research studies.
- * Annual training to raise awareness of our staff to reduce energy and water consumption rates.
to include it constantly in one's plan
- * To purchase environmentally friendly and energy efficient machinery, equipment and consumables and
to ensure continuity,
- * We will use renewable energy in our new investments and repair activities in our facility.
to include energy resources in their projects,
- * Effective waste management and waste reduction through training and preventing the mixing of recyclable waste with household waste.
to be prevented and to achieve zero waste awareness.
